***Response to Arguments***

1. Applicant's arguments, see Remarks/Arguments, filed 8/20/04, with respect to the rejection(s) of claim(s) 1-2 under 35 U.S.C. 102(e) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Kimura et al. (U.S. 5,592,163).

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Kimura et al. (U.S. 5,592,163).

In regard to claim 1, Kimura provides for data adding means for adding specific data to input image data at the end of image data (col.11, lines 14-18); and arithmetic coding unit for coding said image data to which said specific data is added (Fig. 3 element 207, col.19 lines 15-20), wherein said arithmetic coding means codes the specific data after coding the image data (col.11, lines 14-18).

With regard to claim 2, Kimura provides for a adding data generating means for generating specific data (Fig.3 element 521,col.19 lines 10-14); and arithmetic coding means for receiving the specific data after input of image data, coding the specific data immediately after coding of the image data, and issuing coded data (Fig. 3 element 207,

Art Unit: 2625

col.19 lines 15-20), wherein said adding data generating means generates the specific data until the arithmetic coding means issues a specified amount of the coded data( Fig.3 element 521,col.19 lines 10-14).
